

DANDELION

Durable, light, universal

3rd Gen.
PKQJH72J 550W

More fire resistance

as we use particularly developed front and rear encapsulation materials which make them superior in fire resistance

More immunity against moisture

as we switched to a thicker backsheet

More constructional savings

as there is no sub construction needed

More hotspot resistance

based on cell-level hotspot prevention technology

The next level of lightweight photovoltaic – addressing and solving challenges of people and companies which are in need for glass and lightweight photovoltaic by using our innovative PEC-BC technology – while keeping the weight low.

- Higher output – 2% more out of every module due to “miss” of busbars in the front of the cell and no shade created
- Higher reliability – as the lower degradation rate, superiority in fire-resistance, excellent performance in dynamic load (wind, snow, hail etc.) make them more durable and reliable
- Higher performance – due to optimized heat transmission using copper
